Career Objective

MCA student with a strong foundation in Java, software development, web technologies, database management, and AI-powered applications. Experienced in developing academic and real-world projects using Java, Flutter, Next.js, Firebase, and Python, with hands-on experience in application development, deployment, and team leadership. Seeking an entry-level software development opportunity to apply my technical knowledge, solve real-world problems, and contribute to innovative projects while continuously enhancing my skills.

Education

GEORGE COLLEGE Kolkata
Bachelor's of Computer Application August 2021--July 2025

ACHARYA INSTITUTE OF GRADUATE STUDIES Bengaluru
Masters's in Computer Application October 2025—pursing

Projects

❖ **KITSU** | Link **FLUTTER | FIREBASE | AI**
KITSU is an AI-powered adaptive learning platform designed to help users assess, improve, and verify their skills through personalized AI-driven assessments. The platform features secure authentication, Career DNA analysis, personalized learning roadmaps, real-time progress tracking, leaderboards, and recruiter-ready verified skill profiles. It aims to provide a personalized learning experience by helping users identify their strengths, track their development, and showcase their verified skills

❖ **AIKYAM 2K26 | Event Management Web Application |** Link **Next.js | Firebase Hosting | Firestore | JavaScript**
AIKYAM 2K26 is a web application developed for the IT fest organized at Acharya Institute of Graduate Studies to provide a digital platform for the fest and its associated activities. Served as a Lead Developer and Architect, contributing to the application's development, build automation, and deployment. Worked with Next.js static export, automated version stamping, service worker configuration, and Firebase Hosting. The project involved implementing a production build workflow and integrating Firestore into the deployment process to support the application's requirements.

❖ **CampusFind AI | Multimodal AI-Powered Lost-and-Found Matcher |** Link
Tech - Flutter | Dart | Python | FastAPI | ResNet50 | SBERT | XGBoost | Supabase
Developed a cross-platform lost-and-found management platform for university campuses that uses multimodal AI to match lost and found item reports. Integrated ResNet50 for image feature extraction, SBERT for semantic text similarity, and XGBoost to calculate match confidence using image, description, location, and time-based features. Implemented Supabase authentication, PostgreSQL storage, image uploads, and an admin dashboard for reviewing matches and ownership claims.

❖ **SMART-PASSWORD-VAULT** | Link **JAVA | JDBC | MYSQL**
The **Smart Password Vault** allows users to securely store and manage digital credentials, including adding, retrieving, updating, and deleting login details through a console-based interface. It features master authentication, AES encryption for secure password storage, duplicate credential prevention, audit logging, and MySQL database integration to ensure data security and integrity. Its key USP lies in implementing real-world security practices by encrypting sensitive data and enforcing controlled access, making it more advanced than basic credential management systems.

Internship Experience

CODSOFT | JAVA DEVELOPER INTERN **Kolkata(remote)**

- Gained Hands on skill in Java development.
- Developed several projects for the institution.
- Also managed a team of interns where being a team leader it was my responsibility to complete the assigned work in a given time period making all the team members work efficiently.

EUPHORIA GENX | ADVANCE JAVA **Kolkata**

- have done Industrial training in Advance java
- from Euphoria genx(A unit of Techno Exponent software services).
- Completed my practices on JSP, Servlet, Core Java, JDBC.

Skills

Programming Languages	C,JAVA,PYTHON , FLUTTER
Tools & Technologies	MAVEN, ECLIPSE, VS CODE, GITHUB, CURSOR
Databases:	JDBC, MYSQL,FIREBASE
Frontend:	HTML, CSS,BOOTSTRAP
Backend:	SERVLETS, JSP, JDBC

Certifications & Achievements

- Python for Data Science – NPTEL (IIT Madras)
- Full Stack Java Developer – Udemy
- Advanced Java & Spring Boot – Euphoria GenX
- Red Hat OpenShift Administration I: Operating a Production Cluster (DO180) – Red Hat
- Build and Control Smart Devices Using IoT – Acharya Institute of Graduate Studies, in association with TechKnots
- Digital Public Infrastructure Workshop – eMudhra
- DECIPHER-X 2026 – National Level Hackathon, AI & Cyber Security Track – Participation Certificate
